Final Assignment Review

What you need to know!
Video Presentation Final Project

- You will record a 8-14 minute video on a medical topic you find interesting (same as the research paper)
- You will create a PowerPoint or Google Slides presentation
- After completing, you submit to youtube.
- I award creativity, diligence, and professionalism.
- I will review the rubric shortly...
Presentation Formatting...
(Introduction) approx 1 min

1. INTRO (1-2 slides)
   - Introduce yourself
   - Introduce the topic (reason for choosing it, briefly explain it)
   - This is like your “introduction paragraph” to your video.
   - Make a strong thesis statement before moving on to the next slides...
Presentation Formatting...
(BODY)

Approx 5-7 min

- These are like your body paragraphs
- The topic should be in essay format
  - One main idea with many subtopics (paragraphs)
- Slides are like the paragraphs
- Write an outline first on paper, notes for each slide, and practice before you record!
- Keep bullet points fairly short (unless you are directly quoting) and verbally explain the notes instead of reading off the powerpoint
Fearfully and Wonderfully Made

- After our many discussions about creation, what makes you convinced that God is the artist behind every living thing?
- Use specific examples that we have learned and discussed this year if possible.
- Is evolution a logical explanation of life? Why or why not?
- Use 1 of your sources on this slide...

(approx 2-3 min)
Conclusion (approx 1 min)

- Wrap up all slides and leave a powerful closing statement.
- This final slide (or couple slides) will be the point where everything is wrapped up in a comprehensive way.
- It should leave me very informed about your topic and wanting to find out even more!
